CLOSEBOARD FENCE & LEAN TO SHED

About This Case Study

Originally installed by DBS four years ago, a fire had recently destroyed this bespoke fence / storage area. Having cleared the site, the lean to shed / closeboard fence was completely re built to create a smart, secure boundary and practical outdoor storage space.

PRODUCT USED

- PermaTimber notched posts
- Featheredge boards
- Postmix
- Timber gravel boards
- Ungraded carcassing
- Hardwood ply sheet
- Roofing felt
- Round top palisade fencing
- Galvanised door furniture

All product was supplied by Cheltenham Fencing and Landscaping Supplies. Having re built the fence, roof joists were then suspended between it and a new timber wallplate. These joists were then clad with ply before roofing felt was fixed to make it watertight.

The PermaTimber Posts have a unique 15 year product guarantee and to increase the strength of the structure, posts were set at 1m centres. Finally the entrance door was constructed on site using 47 x 75mm framing, clad with featheredge boards.

A truly secure, bespoke installation that combines a smart new fence with practical lean to shed and storage area.
