Project Title: **Walford Village Hall Play Area**
Installation Company: **Evolution Group Ltd.**

What makes this project special?

This was a local community project with Walford Timber donating the product to be installed.

About the product

This large playground fencing installation using Palisade Fencing and PermaTimber posts from Walford Timber. Timber palisade fencing is sometimes referred to as picket fencing and is a traditional fencing solution, often used in a cottage or rural garden as well as to create a safe play area.

Product detail:

Easy to install, Palisade Fencing is available as pre-made panels and posts, as well as individual pales for self-assembly.

Palisade panels can have either flat, round or pointed tops and are constructed to order using 22x75mm pales, fixed to a 38x75mm backing rail which can be pressure-treated in brown or green. To create a more decorative finish the panels can also be manufactured with a concave top.

Good to know:

The palisade fencing is supplied with a 10 year guarantee and the PermaTimber fence posts have a 15 year product guarantee.
